ASHIQUE P J

Full Stack Developer (Frontend and Backend) — React.js, Next.js, Node.js & AI/LLM Integration

Dubai, United Arab Emirates | +971 50 561 9899 | ashiquejabbar007@gmail.com
linkedin.com/in/ashique-pj | ashiquedev.netlify.app | **Immediate Joiner**

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience, specializing in server-rendered Next.js and LLM-powered products. Builds SEO-friendly Next.js (App Router, SSR/SSG) apps with React and TypeScript, and integrates any LLM provider, including OpenAI, Claude, and Google Gemini, from prompt design and structured, streamed output to the interface. Also ships React Native apps for iOS and Android and Node.js (Express) and MongoDB APIs on AWS behind Nginx. Built the natural-language property search behind kyna.ai in Dubai, and bilingual Arabic/English (RTL) platforms for UAE government and enterprise clients, including an 11-role document system with biometric verification used by 500+ people daily.

TECHNICAL SKILLS

Frontend: Next.js (App Router, SSR/SSG), React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, React Native (iOS & Android), Micro Frontends (Module Federation)

AI / LLM: Generative AI, LLM Integration, OpenAI API (GPT), Claude API (Anthropic), Google Gemini API, Prompt Engineering, Structured JSON Output, Streaming Responses, Secure AI API Endpoints (Node.js), Computer Vision (MediaPipe FaceMesh)

Backend: Node.js, Express, REST API Design & Integration (CRUD), Third-Party API Integration, MongoDB (Mongoose Schema Design), PostgreSQL, Supabase, Firebase, Zod, Yup, File Uploads (Multer), Nodemailer (SMTP), Python, Django, MySQL

UI Libraries: Tailwind CSS, shadcn/ui, Material-UI, Ant Design, Mantine

State and Data: Zustand, Redux, Context API, TanStack Query, React Router, Axios, RESTful APIs, WebSockets

Security: JWT Authentication, Passport.js, OAuth 2.0, Role-Based Access Control (RBAC), Authorization Middleware, Biometric SDK Integration

Testing: Playwright, End-to-End Testing, Cross-Browser Testing

DevOps and Tools: AWS (EC2) Hosting, Nginx (Reverse Proxy), Docker, ngrok, Git, GitHub, GitHub Actions, CI/CD Pipelines, Webpack

UI/UX: Arabic/English RTL Layouts, Responsive Design, WCAG/ARIA Accessibility, Semantic HTML, SEO

PROFESSIONAL EXPERIENCE

Full Stack Developer (React.js, Next.js, Node.js, LLM)

Sep 2022 – Apr 2026

Floges Software Solutions, India | Clients in UAE and Middle East (Government and Private Sector)

- Built production Next.js (App Router, SSR/SSG) and React.js applications with TypeScript, using server-side rendering for SEO and fast first loads, including bilingual Arabic/English interfaces with full RTL/LTR switching for UAE clients, and React Native apps for iOS and Android.
- Integrated OpenAI, Claude, and Google Gemini LLM APIs into client products, designing project-specific prompts, enforcing structured JSON output, and streaming AI responses into React.js and Next.js interfaces.
- Architected RBAC for government document management platforms with up to 11 user roles, biometric verification (iris, fingerprint, facial recognition), and multi-level approval workflows, serving 500+ daily users.
- Built Node.js (Express) REST APIs with full CRUD over MongoDB (Mongoose schema design), PostgreSQL, and Supabase, connecting the frontend to AI providers and keeping API keys and prompt logic server-side.
- Implemented authentication and role-based authorization with Passport.js, JWT, and OAuth 2.0, validated requests and forms with Zod and Yup, and handled file uploads.
- Created reusable component libraries with React.js and TypeScript (Material-UI, Tailwind CSS, shadcn/ui) shared across 5+ client projects, speeding up UI delivery and keeping design consistent.
- Optimized page load performance using code splitting, lazy loading, memoization, and Webpack tuning, reducing initial bundle size and improving Core Web Vitals.
- Implemented Micro Frontend architecture with Webpack Module Federation, splitting monolithic applications into independently deployable modules so teams could develop and release in parallel.

- Sent transactional email with Nodemailer (SMTP), deployed services on AWS (EC2) behind Nginx, and used ngrok for webhook testing.
- Connected REST APIs with TanStack Query caching, optimistic UI updates, and WebSocket features for live notifications and chat, with CI/CD via GitHub Actions.

Python Developer (React.js, Python)

Mar 2021 – Aug 2022

Infox Technologies, India

- Developed and maintained client web applications with React.js on the frontend and RESTful APIs with Python and Django on the backend.
- Designed and optimized MySQL schemas and queries, improving query response times and data integrity.

PROJECTS

kyna.ai - AI Property Finder (kyna.ai)

Next.js (SSR/SSG), TypeScript, Tailwind CSS, Node.js, OpenAI API | Dubai, UAE

- Developed an AI-driven property search platform for the Dubai real estate market, using the OpenAI API to turn natural-language queries into property matches and recommendations, with SEO-optimized server-side rendering.
- Integrated property listing APIs and a lead management system for channel partners, enabling real-time property matching for agents.

IDMS - Government Document Management System

React.js, TypeScript, Zustand, Material-UI, Biometric SDKs | Middle East Government Project

- Developed bilingual Arabic/English UI with RTL support for secure document handling and role-based data visibility.
- Integrated iris, fingerprint, and facial recognition SDKs for identity verification.

Sinyar - Access Management System

React.js, TypeScript, Zustand, Material-UI | Abu Dhabi, UAE

- Designed RBAC with 5 user roles for company and employee workflow management with multi-level approvals.
- Built bilingual Arabic/English (RTL) dynamic forms and approval dashboards.

Orbin - Professional Networking Platform (theorbin.com)

Next.js, React Native, TypeScript, OpenAI API, WebSockets, TanStack Query

- Built a LinkedIn-style networking platform for web and mobile (React Native on iOS and Android) with consultation booking, real-time messaging, and push notifications.
- Added an optional AI rewrite of the profile summary with the OpenAI API, so users can polish their summary whenever they want.
- Reduced redundant API calls with TanStack Query caching and WebSocket-based notifications, improving app responsiveness.

Virtual Optical Store - AI-Powered Eyewear E-Commerce

React.js, Node.js, TypeScript, MediaPipe FaceMesh

- Developed an e-commerce platform with Virtual Try-On using MediaPipe FaceMesh for real-time glasses fitting.
- Implemented role-based access for 4 user types (Admin, Optician, Salesman, Customer) with a responsive cross-device UI.

EDUCATION AND CERTIFICATIONS

Bachelor of Computer Applications (BCA)

2017 – 2020

MG University, Kerala, India | Degree attested

Certified Python Developer

2021

Nordic Academy
