

ASHIQUE P J

Frontend Developer | React.js & Next.js Specialist

Dubai, UAE • +971 50 561 9899 • ashiquejabbar007@gmail.com • LinkedIn

PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building high-performance web applications using React.js, Next.js, and TypeScript. Delivered enterprise platforms including government RBAC systems with biometric verification, AI-powered real estate apps, and professional networking platforms. Based in Dubai — Immediate Joiner.

TECHNICAL SKILLS

Frontend React.js, Next.js (SSR/SSG), Remix.js, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn/ui, Material-UI, Ant Design, Mantine

State & Libraries Zustand, Redux, Context API, TanStack Query, React Router, Axios, JWT Authentication

Backend Node.js, Python, Django, RESTful APIs, PostgreSQL, MongoDB, MySQL, Firebase

DevOps & Tools Git, GitHub, Docker, AWS (EC2, S3), GitHub Actions, CI/CD Pipelines, WebSockets

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer

May 2026 – Present

Self-Employed, Dubai (Remote)

- Delivering end-to-end frontend solutions — from requirement analysis and architecture to development and deployment.
- Building responsive, cross-device web applications using React.js, Node.js, and TypeScript, featuring AI integrations.

React Developer

Sep 2022 – Apr 2026

Floges Software Solutions, India

- Engineered reusable component libraries with React.js and TypeScript using Material-UI, Tailwind CSS, and shadcn/ui across multiple client projects, improving UI development speed and ensuring design consistency.
- Improved page load performance through code splitting, lazy loading, memoization, and Webpack optimization, significantly reducing initial bundle size.
- Architected RBAC systems supporting up to 11 user roles for government document management platforms, serving enterprise-scale workflows.
- Developed biometric verification modules (iris, fingerprint, facial recognition) and multi-level approval workflows for secure government applications.
- Integrated RESTful API endpoints with optimistic UI updates and TanStack Query caching, improving perceived load times across applications.
- Implemented real-time WebSocket features for live notifications, chat, and collaborative workflows, enhancing user engagement.
- Worked with CI/CD pipelines using GitHub Actions, contributing to automated testing and deployment for faster, reliable releases.

Python Developer

Mar 2021 – Aug 2022

Infox Technologies, India

- Developed and maintained RESTful APIs using Python and Django for various web applications.
- Designed and optimized MySQL database schemas, improving query response times and ensuring data integrity at scale.
- Contributed to frontend development using React.js, bridging full-stack capabilities and accelerating feature delivery across projects.

KEY PROJECTS

kyna.ai — AI Property Finder (kyna.ai)

Next.js (SSR/SSG), TypeScript, Tailwind CSS, OpenAI API

- Developed AI-driven property search platform for Dubai real estate market with intelligent recommendation engine and SEO-optimized server-side rendering.
- Integrated property listing APIs and lead management system for channel partners, enabling real-time property matching for agents.

Orbin — Professional Networking Platform (theorbin.com)

Next.js, React Native, TypeScript, WebSockets, TanStack Query

- Developed LinkedIn-style networking platform with consultation booking, real-time messaging, and push notifications across web and mobile.
- Optimized data fetching with TanStack Query caching and WebSocket-based real-time notifications, significantly reducing unnecessary API calls.

IDMS — Government Document Management System

React.js, TypeScript, Zustand, Material-UI, Biometric SDKs | Middle East Govt. Project

- Architected RBAC with 11 user roles, biometric verification (iris, fingerprint, facial recognition), and multi-level approval workflows for enterprise-scale government operations.
- Developed secure UI components for document handling, audit trail tracking, and role-based data visibility.

Sinyar — Access Management System

React.js, TypeScript, Zustand, Material-UI | Abu Dhabi, UAE

- Designed RBAC with 5 user roles for company and employee workflow management with secure, multi-level approval processes.

Virtual Optical Store — AI-Powered Eyewear E-Commerce

React.js, Node.js, TypeScript, MediaPipe FaceMesh, AI/ML

- Developed full-featured e-commerce platform with AI-powered Virtual Try-On using MediaPipe FaceMesh for real-time glasses fitting visualization.
- Implemented role-based access for 4 user types (Admin, Optician, Salesman, Customer) with responsive cross-device UI.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA)

2017 – 2020

MG University, Kerala, India

Certified Python Developer

2021

Nordic Academy
